

Amendments to the Specification:

Please amend the paragraph at page 23, line 17 to page 24, line 6 as follows:

Fig. 7 shows how the resident directory of "OTHERS" 101 is provided in the root directory. Further, a non-resident directory is provided for "NORMAL RECEIVING 001" 102, "NORMAL RECEIVING 002" 103, ~~"MEMORY~~ "NORMAL RECEIVING 999" 104, "MEMORY RECEIVING 001" 105, "MEMORY RECEIVING 002" 106 and "MEMORY RECEIVING 999" 107. Further, a subdirectory is provided one level lower in these directories. For example, a non-resident directory of "RECEIVING TEMPORARY" 108 is provided in the resident directory of "OTHERS", non-resident directories of "IMAGE 1-n" 109, 110 and 111 are provided in the directory of "NORMAL RECEIVING 001" ~~respectively~~, and "IMAGE 1-n" 112, 113 and 114 are provided in the directory of "MEMORY RECEIVING 001". ~~, respectively.~~

Please amend the paragraph at page 29, line 21 to page 30, line 9 as follows:

When the "PRINTING" mode is selected, i.e. when it has been determined that a check mark is put in the CHECK column (parenthesis) of the ~~"PC TRANSMISSION"~~ "PRINTING" as a result of the returned electronic mail having been processed by the data processing section 14, if there is any numeral immediately before the check column, the control section 16 gives instructions to the data processing section 14 to assume this numeral as the number of bundle of copies to be outputted. The data processing section 14 sends to the recording section 34 the image data to be outputted, and this instruction is given. Based on this instruction, the recording section 34 forms an image from the image data and outputs it.
